

SANDRA L. "SANDY" GENIS
Land Planner/Councilwoman

Education: Estancia High School, Stanford University

In turbulent times like these, we need common sense solutions based on fiscal responsibility.

Public safety:

Fully fund and equip police for truly community oriented policing.
Maintain and improve emergency response.
Address homelessness with compassion while enforcing city ordinances.

It's time to protect our residential neighborhoods from negative effects of other uses, whether party house rentals or group homes; overflow parking and noise from nearby commercial uses; cut-through traffic; or airport noise. It's time to restore Fairview Park and open Lions Park airplane play area.

But it won't matter how great any solutions are, if the City's broke. Stop waste, and target limited funds to community needs, not just wants. Necessities come first-- safety; needed infrastructure like streets, sidewalks, and parks. And help for our businesses and residents hard hit by COVID-19.

Residents must be fully involved in decisions affecting their lives. I'll keep fighting to preserve your right to vote on major development projects provided under the people's Measure Y.

I pledge to be accountable to the public, treating residents with respect. I pledge to make decisions based on facts and public input, working cooperatively with others.

For practical, nonpartisan leadership, vote Sandy Genis for Costa Mesa Mayor.
